**DANIEL E. GOTTSCHLING**

The Pew Scholars Program in the Biomedical Sciences

Transcript of an Interview  
Conducted by

Andrea R. Maestrejuan  
at

Fred Hutchinson Cancer Research Center  
Seattle, Washington

on

8, 9, and 10 December 1997

From the Original Collection of the University of California, Los Angeles

## ACKNOWLEDGEMENT

This oral history is part of a series supported by a grant from the Pew Charitable Trusts based on the Pew Scholars Program in the Biomedical Sciences. This collection is an important resource for the history of biomedicine, recording the life and careers of young, distinguished biomedical scientists and of Pew Biomedical Scholar Advisory Committee members.

This oral history was completed under the auspices of the Oral History Project, University of California, Los Angeles (Copyright © 1999, The Regents of the University of California) and is made possible through the generosity of

**From the original collection at the Center for  
Oral History Research, UCLA Library, UCLA.**

The following oral history, originally processed at the UCLA Center for Oral History Research, has been reformatted by the Chemical Heritage Foundation. The process involved reformatting the front matter, adding a new abstract, replacing the table of contents, and replacing the index. The paragraph spacing and font of the body of the transcript were altered to conform to the standards of the Oral History Program at the Chemical Heritage Foundation. The text of the oral history remains unaltered; any inadvertent spelling or factual errors in the original manuscript have not been modified. The reformatted version and digital copies of the interview recordings are housed at the Othmer Library, Chemical Heritage Foundation. The original version and research materials remain at the Darling Library, University of California, Los Angeles and at the Bancroft Library, University of California, Berkeley.

**REFORMATTING:**

Holly Polish, Program Intern, Oral History, Chemical Heritage Foundation. B.A., History, American University.

David J. Caruso, Program Manager, Oral History, Chemical Heritage Foundation. B.A., History of Science, Medicine, and Technology, Johns Hopkins University; PhD., Science and Technology Studies, Cornell University.

UNIVERSITY OF CALIFORNIA, LOS ANGELES

Oral History Interview Agreement No. 971217

This Interview Agreement is made and entered into this 21<sup>st</sup> day of May, 1998 by and between THE REGENTS OF THE UNIVERSITY OF CALIFORNIA, a California corporation, on behalf of the Oral History Program at the UCLA campus, hereinafter called "University," and DANIEL E. GOTTSCHLING, having an address at Fred Hutchinson Cancer Research Center, 1100 Fairview Avenue North, Mailstop A3-025, P.O. Box 19024, Seattle Washington 98109-1024, hereinafter called "Interviewee."

Interviewee agrees to participate in a series of University-conducted tape-recorded interviews, commencing on or about December 8, 1997, and tentatively entitled "Interview with Daniel E. Gottschling" This Agreement relates to any and all materials originating from the interviews, namely the tape recordings of the interviews and a written manuscript prepared from the tapes, hereinafter collectively called "the Work."

In consideration of the mutual covenants, conditions, and terms set forth below, the parties hereto hereby agree as follows:

1. Interviewee irrevocably assigns to University all his copyright, title and interest in and to the Work. This assignment applies to University, its successors, and assigns, for and during the existence of the copyright and all renewals and extensions thereof.
2. By virtue of this assignment, University will have the right to use the Work for any research, educational, or other purpose that University may deem appropriate.
3. Interviewee acknowledges that he will receive no remuneration or compensation for his participation in the interviews or for the rights assigned hereunder.
4. Interviewee will receive from University, free of charge, one bound copy of the typewritten manuscript of the interviews.
5. To insure against substantive error or misquotation, Interviewee will have the right to review the manuscript before it is put into final form. University therefore will send Interviewee a copy of the edited transcript for review and comment. Interviewee will return transcript and comments to University within 30 days of receipt of the transcript. In the event that Interviewee does not respond within 30 days, University will assume that Interviewee has given full approval of the transcript.

6. All notices and other official correspondence concerning this Agreement will be sent to the following:

If to University: Office of Research Administration  
University of California, Los Angeles  
P.O. Box 951406  
Los Angeles, California 90095-1406  
  
Attention: Ms. Carli V. Rogers  
Copyright Officer

If to Interviewee: Daniel E. Gottschling  
Fred Hutchinson Cancer Research Center  
1100 Fairview Avenue North  
Mailstop A3-025  
P.O. Box 19024  
Seattle, Washington 98109-1024

University and Interviewee have executed this Agreement on the date first written above.

Pew Scholars in the Biomedical Sciences  
Chemical Heritage Foundation Internet Posting Release Form

I, Daniel E. Gottschling, Ph.D., hereby grant permission to post portions of the digital copy of the audio-taped interview of me, and the related written transcript, on the internet for non-commercial, educational use only as per the checked selection below.

Please check one:

- a. \_\_\_\_\_ **No restrictions for Internet Posting.**  
**NOTE:** Users citing this interview for purposes of publication are obliged under the terms of the Chemical Heritage Foundation Oral History Program to obtain permission from Chemical Heritage Foundation, Philadelphia, Pennsylvania.
- b. X \_\_\_\_\_ **Semi-restricted Internet Postings** (My review of the material intended to post is required.)
- c. \_\_\_\_\_ **Restricted access.** (Do not post.)

This constitutes my entire and complete understanding.

Daniel E. Gottschling  
Daniel E. Gottschling, Ph.D.

Date Jan 15, 2008

This interview has been designated as **Free Access**.

One may view, quote from, cite, or reproduce the oral history with the permission of CHF.

**Please note:** Users citing this interview for purposes of publication are obliged under the terms of the Chemical Heritage Foundation Oral History Program to credit CHF using the format below:

Daniel E. Gottschling, interview by Andrea R. Maestrejuan at the Fred Hutchinson Cancer Research Center, Seattle, Washington, 8-10 December 1997 (Philadelphia: Chemical Heritage Foundation, Oral History Transcript # 0432).

Chemical Heritage Foundation  
Oral History Program  
315 Chestnut Street  
Philadelphia, Pennsylvania 19106

The Chemical Heritage Foundation (CHF) serves the community of the chemical and molecular sciences, and the wider public, by treasuring the past, educating the present, and inspiring the future. CHF maintains a world-class collection of materials that document the history and heritage of the chemical and molecular sciences, technologies, and industries; encourages research in CHF collections; and carries out a program of outreach and interpretation in order to advance an understanding of the role of the chemical and molecular sciences, technologies, and industries in shaping society.

## DANIEL E. GOTTSCHLING

1955 Born in Gary, Indiana on 28 May.

### Education

1977 B.A., Augustana College  
1980 M.S., University of Colorado, Boulder  
1984 Ph.D., University of Colorado, Boulder

### Professional Experience

1984-1988 Fred Hutchinson Cancer Research Center, Seattle, Washington  
Postdoctoral Fellow  
1996-present Full Member

1981-1982 Western State College of Colorado, Gunnison, Colorado  
Instructor, Department of Chemistry

1989-1994 University of Chicago, Department of Molecular Genetics and Cell  
Biology,  
Assistant Professor  
1994-1996 Associate Professor

### Honors

1991-1995 Pew Scholars Program in the Biomedical Sciences Grant  
1995 National Academy of Sciences Award in Molecular Biology  
1995-1997 Fletcher Scholar of the Cancer Research Foundation

### Selected Publications

## ABSTRACT

**Daniel E. Gottschling** and his younger sister were born in Gary, Indiana. Their father was first an engineer and then in middle management at Bell Systems; their mother was an architect until she had children. Daniel attended a Lutheran school until the family moved when Daniel was in junior high school. Woods near his house provided free-time entertainment; there he began his interest in science by collecting spiders. Both sets of grandparents lived nearby, and the families were very close. Daniel spent a great deal of time with adults, listening to their stories and absorbing their experiences (and incidentally learning to shoot pool).

When Daniel was beginning junior high school the family moved to nearby Portage, Indiana, where Daniel began public school. Although he did not like school and was often sick, he did well, especially in science and mathematics. In eighth grade he had a wonderful biology teacher who knew about spiders, but otherwise Daniel was academically uninspired. He took up violin, began singing in a choir, and acted in all his high school plays. He and two friends formed a rock band that did very well, even playing at Earl of Old Town in Chicago, backup for Steve Goodman.

Not sure where to go to college, he visited a friend at Augustana College and decided to go there. He had to drop out of his rock band, but at college he immediately joined a choir, which practiced every day and travelled all over the world, and formed another rock band, all while studying and engaging in philosophical and historical discussions with faculty and fellow students. His chemistry and mathematics classes were excellent, and he chose chemistry as his major. He did not think much about where this was all leading until near the end of college, when he decided he did not want to be a doctor and might want to be a scientist. He was accepted into graduate school at the University of Colorado in Boulder. He helped new faculty member Thomas Cech set up his lab and set to work there. When Gottschling blew up the microwave in the lab and when his experiments were not working out well, he was discouraged and accepted a one-year job at Western State College of Colorado in Gunnison, Colorado, where he taught introductory chemistry. He liked teaching, but found that he liked the bench better and went back to Cech's lab to work on ciliate chromosomes, finally focusing on telomeres. When he saw Seattle he loved it and accepted a postdoc at the Fred Hutchinson Cancer Research Center, working on ciliate telomeres in Virginia Zakian's yeast genetics lab.

Eventually Gottschling accepted an assistant and then an associate professorship at the University of Chicago, leaving behind his ciliates and moving into yeast and epigenetics. After seven years he opted for less teaching and more bench work at the Fred Hutchinson Cancer Research Center, where he continues his research on yeast, believing that if one starts at one end and burrows through to the other end of something he can learn how that something works. Gottschling has won the Pew Scholars in the Biomedical Sciences Award and the National Academy of Sciences Award in Molecular Biology. He still loves music, though he has less time for it than he would like. He teaches in the Science-Education-Partnership (SEP), run by Barbara Berg. And, of course, he continues his beloved benchwork.

## UCLA INTERVIEW HISTORY

### INTERVIEWER:

Andrea R. Maestrejuan, Interviewer, UCLA Oral History Program; B.S., Biological Sciences, University of California, Irvine, 1986; M.A., History, University of California, Riverside, 1991; C.Phil., History, University of California, Riverside.

### TIME AND SETTING OF INTERVIEW:

**Place:** Gottschling's office, Fred Hutchinson Cancer Research Center.

**Dates, length of sessions:** December 8, 1997 (147 minutes); December 9, 1997 (84) ; December 10, 1997 (117).

**Total number of recorded hours:** 5.8

**Persons present during interview:** Gottschling and Maestrejuan.

### CONDUCT OF INTERVIEW:

This interview is one in a series with Pew Scholars in the Biomedical Sciences conducted by the UCLA Oral History Program in conjunction with the Pew Charitable Trusts's Pew Scholars in the Biomedical Sciences Oral History and Archives Project. The project has been designed to document the backgrounds, education, and research of biomedical scientists awarded four-year Pew scholarships since 1988.

To provide an overall framework for project interviews, the director of the UCLA Oral History Program and three UCLA faculty project consultants developed a topic outline. In preparing for this interview, Maestrejuan held a telephone preinterview conversation with Gottschling to obtain written background information (curriculum vitae, copies of published articles, etc.) and agree on an interviewing schedule. She also reviewed prior Pew scholars' interviews and the documentation in Gottschling's file at the Pew Scholars Program office in San Francisco, including his proposal application, letters of recommendation, and reviews by Pew Scholars Program national advisory committee members. For technical background, Maestrejuan consulted J.D. Watson et al., *Molecular Biology of the Gene*. 4th ed. Menlo Park, CA: Benjamin/Cummings, 1987, Bruce Alberts et al., *Molecular Biology of the Cell*. 3d ed. New York: Garland, 1994, and Horace F. Judson, *The Eighth Day of Creation*. New York: Simon and Schuster, 1979.

The interview is organized chronologically, beginning with Gottschling's childhood in Gary, Indiana, and continuing through his graduate work at University of Colorado, Boulder, his postdoc at the Fred Hutchinson Cancer Research Center, and the establishment of his own labs at the University of Chicago and then at the Fred Hutchinson Center. Major topics discussed include Gottschling's association with Thomas R. Cech, his deciphering of the chromosome structure in *Tetrahymena*, his work on the telomere position effect, and his interest in educating

the public on scientific matters.

#### ORIGINAL EDITING:

Gail Ostergren, editorial assistant, edited the interview. She checked the verbatim transcript of the interview against the original tape recordings, edited for punctuation, paragraphing, and spelling, and verified proper names. Words and phrases inserted by the editor have been bracketed.

Gottschling reviewed the transcript. He verified proper names and made minor corrections and additions.

William Van Benschoten, editor, prepared the table of contents, biographical summary, and interview history. Ödül Bozkurt, editorial assistant, compiled the index.

## TABLE OF CONTENTS

Early Years	1
Born in Gary, Indiana. Family background. Difficult neighborhood. Collecting spiders. Parents' occupations. Mother's support and encouragement. Lutheran elementary school. Moving to Portage, Indiana. Public schools. Inspiring high school biology teacher. Music.	
College Years	21
Enters Augustana College. Majors in chemistry. Loves wide-ranging philosophical discussions. Sings in choir. Soccer. Forms band. Decides not to be doctor, but has not yet had labwork, so is not sure about science. Works summers until last summer, when he wins National Science Foundation award to do undergraduate research in C. Weldon Mathews' lab.	
Graduate School Years	26
Chooses University of Colorado in Boulder, Colorado. Starts in quantum chemistry but switches to new department of physical biochemistry. Helps Thomas Cech set up his lab. Works on R loop mapping. Blows up lab's microwave. Teaches introductory chemistry at Western Colorado State University in Gunnison, Colorado for a year. Returns to benchwork in Cech's lab. Gets interested in telomeres. Works with David Prescott.	
Postdoc Years	37
Accepts postdoc in Virginia Zakian's lab at Fred Hutchinson Cancer Research Center in Seattle, Washington. Works on ciliate telomeres. Moves from ciliates into <i>Saccharomyces cerevisiae</i> .	
Faculty Years	67
Accepts assistant professorship at the University of Chicago. Creative thinking there. Setting up his lab. Community outreach through Mini-Med School at public library. Pew Scholars Program in the Biomedical Sciences Award. National Academy of Sciences Award in Molecular Biology. Fetcher Scholar of the Cancer Research Foundation.	
Seattle, Washington Years	73
Decides to move to Fred Hutchinson Cancer Research Center in Seattle, Washington. Seeks more bench time. Virginia Zakian leaves for Princeton University, opening position. Dismay of others at failure to appoint a woman. Basic science leading to clinical applications. Teaching in Science-Education-Partnership (SEP) program run by Barbara Berg. Balancing life inside the lab with life outside.	
Index	85
